HTHP Pressure Relief Tool

Brand:
Product Code: 170-91
Availability: 1
Lead Time: 45

Description
The HTHP Pressure Relief Tool* (#170-91) provides a safe way to release the pressure in a clogged cell. It screws onto the HPHT cell cap using the existing valve stem port. Then, using a T-handle, the operator can drive a pin into the cell to puncture through any obstruction. The pressure will then vent safely through the vent pipe, away from people and equipment.

Features

- Easily punctures filter paper, cement screens, and ceramic disks
- Safely directly vented pressure away from people and equipment
- Conveniently fits the valve stem port on all standard HTHP or HPHT filter press cells

*U.S. Patent No. 9,375,715
