

# Multi-Blade Foam Cement Blending Assembly

**Brand:** OFI Testing Equipment, Inc.

**Product Code:** 124-00

**Availability:** Out Of Stock

**Lead Time:** 90

## Description

The Multi-Blade Foam Cement Blending Container is designed to mix foam cement slurries. The stainless steel container fits on the [OFITE Constant Speed Blender](#). Inside, instead of a single set of blades, it contains a stack of five (5) sets of blades. The extra blades introduce significantly more air into the slurry as it mixes, creating a foam instead of the standard liquid slurry.
