Core Plug Drill

Brand: OFI Testing Equipment, Inc.

Product Code: 127-40 **Availability:** Out Of Stock

Description

The Core Plug Drill is used to cut smaller core specimens from whole cores, blocks, or other media taken from the well bore. We provide a variety of core drill bits, which allows the user to prepare core specimens varying from 0.75" to 2" in diameter. The floormounted press is easy to operate and uses a water cooling system to permit rapid and efficient cutting. It is a simple and reliable method of preparing core specimens for permeability and other tests frequently conducted in petroleum reservoir research facilities. <h2>Features and Specifications</h2> Floor-mounted design Can be used to cut cores 1" in diameter and up to 6" in length (14" available)Splash guard for reducing spillsRotary union with shut-off valve connects drill bit to drill press and feeds coolant to the bit surface drain pan, 6" jaw vise, and hoses for coolantSize: $16" \times 30" \times 67"$ ($41 \times 76 \times 10^{-5}$) drain pan, 6" jaw vise, and hoses for coolant 170 cm)Veight: 235 lb (106.6 kg)<h2>Optional</h2> #127-40-005 Corrosion resistant reservoir with submersible pump, flexible hoses, clamping visesli>li>li>li>220 Volt, 50/60 Hz electrical power supply<h2>Part Number</h2> #127-40
