

OFITE Services

For over 30 years OFI Testing Equipment (OFITE) has provided instruments and reagents for testing drilling fluids, well cements, completion fluids, and wastewater. In addition to these product lines we also offer a range of instruments for core analysis. From our manufacturing facility in Houston, TX we provide customers all over the world with quality products and exceptional service.

Our drilling fluids product line includes both innovative designs and industry standards, giving you all the instruments you need to evaluate drilling fluid properties according to API Recommended Practice 13B-1 and 13B-2.

Our cement product line also includes innovative designs such as the Static Gel Strength Measurement Device (SGSM) which showcases our ability to develop new technology to meet customer and industry demands. We also offer all other instruments required to evaluate cement properties according to API Specification 10.

Our extensive line of Core Analysis products includes equipment for preparing core samples, routine testing, and advanced analysis.

As an independent manufacturer and supplier, OFITE has one priority, our customers.

OFITE Equipment Leasing

Purchasing capital equipment often requires a lengthy and cumbersome approval process. Passing the request up the chain of command can take weeks or months. And success is never guaranteed.

At OFITE, we understand the difficulties you face upgrading your laboratory equipment. That is why we are introducing our new equipment lease program to move the cost from a one-time large capital expense to a low monthly operating expense.

Leases are available in various terms with options to buy out early, trade in for credit and upgrade to the latest model or go full term and own the equipment.

Equipment downtime is costly and inconvenient. So as part of each lease, we include an onsite service package. The service package includes regularly scheduled, on-site service trips every six months. An OFITE certified technician will visit your lab, clean and service the equipment, update software, and check the equipment to ensure it is running at peak performance and within specification.

Equipment Available

- Model 4020-SG Automated UCS/SGSM (#120-59)
- Dual Cell UCA with SGSM (#120-52 and #120-58)
- Model 2025 HTHP Consistometer (#120-35)
- Model 2040 HTHP Consistometer (#120-40)
- Lubricity Evaluation Monitor (#113-00)

Other equipment available.

Scheduled Maintenance

- Upgrade software and firmware
- Clean the instrument
- Service all major systems (heating, plumbing, electrical)
- Replace high-use seals
- Check, clean, and replace filters
- Calibrate
- Validate the equipment is operating within specifications
- All services performed by an OFITE Certified technician
