Dual Nitrogen Manifold

Brand:
Product Code: 171-24
Availability: 6
Lead Time: 15

Description

The Dual Nitrogen Manifold provides Nitrogen pressure to the top and back pressure sides of a High Temperature, High Pressure (HTHP or HPHT) Filter Press. The main manifold attaches to a single Nitrogen tank and two regulators control pressure separately. To prevent over-pressurization, two safety relief valves are included: <ul> Top Pressure: 1,350 PSI (9.3 kPa) Back Pressure: 750 PSI (5.2 kPa)
