Static Oven with Pressure

Brand: OFI Testing Equipment, Inc.
Product Code: 183-00-P
Availability: Call for availability
Call for Price: 832-320-7300

Description
This Static Oven has a single inlet for a regulated pressure source that distributes pressure to up to six Aging Cells at a time. Six valves on the control panel allow pressure to be turned off and on to each cell individually.

This oven provides precise temperature control with an easy-to-use interface.

Features and Specifications

- Digital temperature control
- Maximum Temperature: 550°F (288°C)
- A single regulated pressure source provides pressure to up to six Aging Cells
- Separate valves allow pressure to be turned on or off to each cell individually
- Capacity: 4.5 ft^3 (127 L)
- Power Requirements: 115 Volt, 15 Amp or 230 Volt, 8 Amp, 50/60 Hz

Part Numbers

- #183-00-P
- #183-00-1-P
